

Industrial AC1200 Wave 2 Access Point

The DIS-2650AP Industrial AC1200 Wave 2 Access Point is designed specifically to operate in harsh environments with a wide operating temperature range and surge/ESD protection. It comes in a sturdy metal housing that can be DIN or wall-mounted, ideal for industrial installations.

DIS-2650AP

- Wide operating temperature range with built-in 2 kV surge protection and 15kV ESD protection
- Flexible DIN or wall mountable
- Dual power input for redundant power supplies
- Easy to manage with D-Link's free Nuclias Connect centralised management software or Nuclias Connect Hub
- Works as a standalone AP or as part of a centralised, scalable multi-device deployment
- Superior throughput with dual-band transfer speeds up to 300 Mbps in the 2.4 GHz band and 867 Mbps in the 5 GHz band
- Band Steering ensures devices connect to the best available and supported frequency band
- Supports Power over Ethernet (802.3at) for less cable clutter
- Supports multiple VLANs for enhanced network management and up to 16 SSID setups
- 2 x Gigabit LAN port for high-capacity backhaul to the wired network
- Multiple AP modes to adapt to your network's needs
- Supports WPA2™ Wi-Fi security for more protection
- MAC Address Filtering and WLAN Partitioning ensure ultimate control of your network's access
- Captive Portal with industry-standard authentication for enhanced access management

¹ Maximum wireless signal rate derived from IEEE standard 802.11 and 802.11ac specifications. Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, building materials and construction, and network overhead, lower actual data throughput rate. Environmental factors will adversely affect wireless signal range.

² Please note that operating frequency ranges vary depending on the regulations of individual countries and jurisdictions. The DIS-2650AP may not support the 5.25 - 5.35 GHz and 5.47 - 5.725 GHz frequency ranges in certain regions.

³ For the EU region, this product is compliant with CE regulations and operates within the following frequency ranges: 2.4 - 2.4835 GHz, 5.150 - 5.250 GHz, 5.250 - 5.350 GHz, and 5.470 - 5.750 GHz.
